Installing InteLIS on Ubuntu 22.04 or above (only Ubuntu LTS)

Please note this will work on Ubuntu 22.04 or above (ONLY LTS)

Start the terminal and run these commands ONE BY ONE

```
cd ~;

sudo wget -O setup.sh https://github.com/deforay/intelis/raw/master/scripts/setup.sh

sudo chmod +x setup.sh;

sudo ./setup.sh;

sudo rm setup.sh;

exit
```

Enter the mysql password and STS URL correctly when prompted

InteLIS Setup

- During setup enter the correct STS URL and select the correct Testing Lab
- Once the setup is completed, you can open InteLIS on the browser by visiting http://intelis/
- You will be asked to complete the LIS setup and to register an admin user
- After successful setup and registration, log in as admin at http://intelis/
